### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mrs. Margo Livesay on 9/27/2004.

3. The application has been amended as follows:

In the claims:

i) **Deleted claims 4 and 12.**

ii) **Replace claims 1 and 9:**

**Claim 1.** (Currently amended) A method for servicing requests received by a server in a multiple-user environment, the method comprising the steps of:

- establishing a first session between said server and a first user;
- establishing a second session between said server and a second user;
- responding to requests that are received by said server in said first session by
- executing virtual machine code using a first virtual machine instance; and

responding to requests that are received by said server in said second session by executing virtual machine code using a second virtual machine instance;

wherein said first virtual machine instance and said second virtual machine instance are distinct instances of a same type of virtual machine;

wherein said first virtual machine instance exists within said server concurrently with said second virtual machine instance;

wherein said first virtual machine instance and said second virtual machine instance are two of a plurality of virtual machine instances, associated with said server, that share access to data stored in a shared state area allocated in volatile memory associated with said server;

wherein said plurality of virtual machine instances share read-only access to said data stored in said shared state area allocated in volatile memory within said server; and

wherein establishing the first session between said server and the first user includes establishing a first database session between a database system and the first user; and

establishing the second session between said server and the second user includes establishing a second database session between the database system and the first user.

**Claim 9.** (Currently amended) A computer-readable medium carrying instructions for servicing requests received by a server in a multiple-user environment, the instruction comprising instructions for performing the steps of:

establishing a first session between said server and a first user;

establishing a second session between said server and a second user;

responding to requests that are received by said server in said first session by executing virtual machine code using a first virtual machine instance; and

responding to requests that are received by said server in said second session by executing virtual machine code using a second virtual machine instance;

wherein said first virtual machine instance and said second virtual machine instance are distinct instances of a same type of virtual machine;

wherein said first virtual machine instance exists within said server concurrently with said second virtual machine instance;

wherein said first virtual machine instance and said second virtual machine instance are two of a plurality of virtual machine instances, associated with said server, that share access to data stored in a shared state area allocated in volatile memory associated with said server;

wherein said plurality of virtual machine instances share read-only access to said data stored in said shared state area allocated in volatile memory within said server; and

wherein establishing the first session between said server and the first user includes establishing a first database session between a database system and the first user;

and

establishing the second session between said server and the second user includes establishing a second database session between the database system and the first user.
